

Integrated Lecture Management: Proposal for practical assignment in MoC 2011

Cedric Reginster, Bjoern Mosler

IAM

March 7, 2011

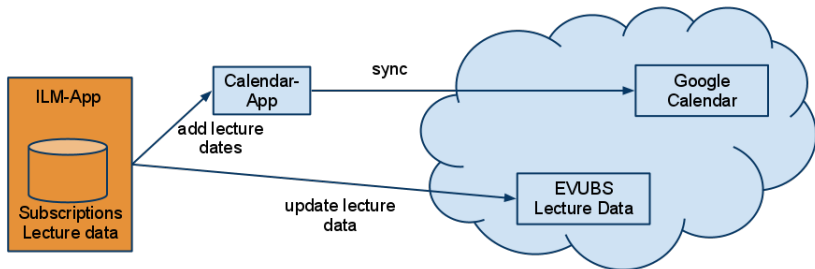

Overview

- 1 Basic Idea
- 2 Involved services
 - EVUBS
 - Google Calendar & Maps
- 3 Application details
 - Functionality
 - Home screen prototype
- 4 Milestones
 - 1
 - 2
- 5 Further features
- 6 Questions

Basic Idea

Make lecture management more convenient by integrating EVUBS, Google Calendar and Google Maps.

Involved services

- A web service which provides lecture data for Uni Bern.
- allows us to mimic `www.evub.unibe.ch`.

Frühjahrssemester 2011

- + Theologische Fakultät
- + Rechtswissenschaftliche Fakultät
- + Wirtschafts- und Sozialwissenschaftliche Fakultät
- + Medizinische Fakultät
- + Vetsuisse-Fakultät
- + Philosophisch-historische Fakultät
- + Philosophisch-humanwissenschaftliche Fakultät
- Philosophisch-naturwissenschaftliche Fakultät
 - + Climate Sciences
 - Philosophie / History and Philosophy of Science (15)
 - Weitere Philosophieveranstaltungen siehe auch Phil.-hist. Fakultät
 - + Mathematik
 - Informatik
 - Bachelorstudium Informatik (2. Semester) (4)
 - Nebenfach Mathematik für Studierende der Informatik im 2. Semester (1)
 - Grundkurs Informatik 2. Semester (1)
 - Bachelorstudium Informatik (4. Semester) (4)
 - Nebenfach Mathematik für Studierende der Informatik im 4. Semester (1)
 - Bachelorstudium Informatik (6. Semester) (2)
 - Master Program in Computer Science (11)
 - Logic in Mathematics and Computer Science (5)

Google Calendar & Google Maps

Is anyone not familiar with those two?

Functionality

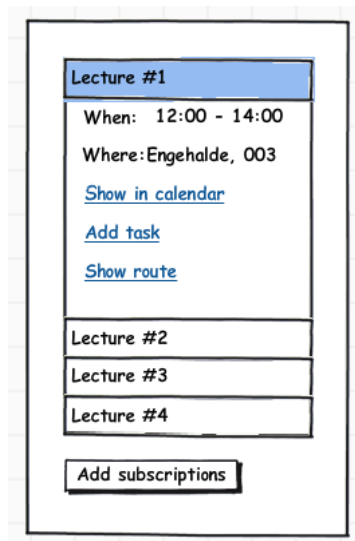

Basic lecture management

- Allow users to browse lectures like in EVUB.
- Allow user to “subscribe” to a lecture.
- Show subscriptions on home screen for convenient access.

Features for subscribed lectures

- On demand present route from current location to where lecture takes place using Google Maps and the device's GPS module.
- Automatically add lecture as an appointment to Google Calendar.
- User may create tasks belonging to a lecture, i.e. weekly exercises, projects etc. Would also be added to Google Calendar.

Home screen prototype

Milestones

Milestone 1

Everything except integration with Google Calendar and Google Maps

- User interface
- Integration with EVUBS
- subscribe-functionality

Milestone 2

Integration with Google Calendar and Google Maps.

Further features

- Generate printable timetable from subscriptions.
- Add reminders based on subscriptions.
- . . .

This is it.
